Lisa

During the DCO Issue Specific Hearings in October I explained the difficulty of providing the Marine Licensing Team with updated submissions in parallel to the DCO examination and I said I'd "catch up" after the close of the DCO Examination.

It's taken me some time but I've now collated all the DCO submissions by ourselves (Pontardawe and Swansea Angling Society Ltd - PASAS) and by Fish Legal and all the responses by TLSB to those submissions. They weigh in at 25MB so I'll zip them up in three blocks and send them attached to three emails following this one. You sent me a 10MB attachment last year so I trust that'll be OK.

Could you please take this information into account in the consideration of the Marine Licence application.

I assume you've had further internal representations from Fisheries and Water Framework staff since the document you sent us on 22nd April last year. Could you please let us see any such representations?

At the (rushed) end of the DCO Examination there were some loose ends relating particularly to WFD waterbodies which I'd like to tie up. I was given conflicting information by Steve Allison and Trevor West, which remains unresolved.

Could you please give us an indication of the "state of play" as far as the ML application is concerned.

Regards
Phil Jones
